

Proceedings of the International Conference on
Recent Advances in Aerospace Hydraulics

Novembre 24-26, 1998, Insa Toulouse, France

ISBN 2-87649-023-4, 23 papers, 169 pages, 156 black and white figures, 60 €

Reliability and service experience of aerospace hydraulic rotating equipment	1
J.J. SCHWEITZER, Vickers Inc., <i>USA</i>	
G. BARROW, Aeroquip-Vickers Ltd, <i>England</i>	
Method for integrated systems design - A study of EHA systems	7
K. NILSSON, Saab AB, <i>Sweden</i>	
J. ANDERSSON and P. KRUS, Linköping Univ., <i>Sweden</i>	
Direct drive fuel valve (DDFV)	15
M.L. DARDENNE and G. D'AGOSTINO, Snecma, <i>France</i>	
E. PERRODEAU, Samm, <i>France</i>	
A unified strategy for flight control actuators	19
M.G. KLIFFKEN, Robert Bosch GmbH, <i>Germany</i>	
M.H. GOJNY, Technische Universität Hamburg Harburg, <i>Germany</i>	
High pressure hydraulic pumps	25
J.A. HALAT, P.W. GALLOWAY, Vickers Incorporated, <i>USA</i>	
A brief history of high pressure hydraulics	31
J. JEFFERY, Parker Hannifin Corporation, <i>USA</i>	
High pressure filter screen capabilities for aerospace programmes	63
J. KLAPPER, the Lee Company, <i>USA</i>	
Potential of secondary control for hydraulic drives used in modern flight control systems	67
M. IVANTYSNOVA, Gerhard Mercator University of Duisburg, <i>Germany</i>	
Power control units with secondary controlled hydraulic motors - a new concept for application in aircraft high lift systems	73
O. BIEDERMANN, Technische Universität Hamburg-Harburg, <i>Germany</i>	
G. GEERLING, Mannesmann Rexroth Brueninghaus Hydromatik GmbH, <i>Germany</i>	
Researches on aerospace hydraulics in Romania	79
N. VASILIU, D. VASILIU, C. CALINOIU and V. MURARU, Politehnica University of Bucharest, <i>Romania</i>	
EHA application to commercial transports : the Aérospatiale approach	85
D. VAN DEN BOSSCHE, Aérospatiale, <i>France</i>	
Flight Control EHAs : Towards high powers	89
B. THORAVAL, Lucas Aerospace, <i>France</i>	
EHA for flight testing on Airbus A321 / Power losses of fix pump EHA versus variable pump EHA	101
M. BILDSTEIN, Liebherr Aerospace Lindenberg GmbH, <i>Germany</i>	
An approach to EHA standardization	105
A. ARNAUD, Samm, <i>France</i>	
The BRISC : A specific processor dedicated to the command of AC electromechanical actuators	117
E. GILSON and J.L. DEBAUCHE, Sabca, <i>Belgium</i>	
Modular triple-simplex redundant EHA developed for Moog R&D	123
B. WAFFNER, Moog Incorporated, <i>USA</i>	
Research on PbW airborne hydraulic actuation system	127
Z. WANG, L. QIU and X. QI, Beijing University of Aeronautics and Astronautics, <i>China</i>	
JSF Integrated Subsystems Technology (J/IST) – Not printed !	133
D. EICKE, Lockheed Martin Tactical Aircraft Systems, <i>USA</i>	
A. MORDKOVITZ, Parker Hannifin Corporation, <i>USA</i>	
A solution for structural coupling in a thrust vector control system (TVC)	135
D. MARTINEZ, P. CAYE and P. TRILLAT, Aérospatiale, <i>France</i>	
Some aspects of the stability of missiles flight control systems using electrohydraulic actuators	143
R. LUCA, Military Technical Academy, <i>Romania</i>	
The design of pitch and roll actuators for a high performance human centrifuge	149
P. MOULAIRE, Imagine, <i>France</i>	
J.C. MARE, INSA Toulouse, <i>France</i> , T. EFTYMIADES, Latécoère, <i>France</i>	
Experimental investigation of observer based robust failure detection of hydraulic control actuator	155
L. QIU, Z. WANG and X. DONG, Beijing Univ. of Aeronautics and Astronautics, <i>China</i>	
The use of an impedance analysis of an hydraulic servo to investigate control compensation for flutter suppression	161
R. RAVALL, Fairey Hydraulics Ltd, <i>England</i>	
N.D. VAUGHAN, University of Bath, <i>England</i>	

Proceedings of the 1st International Conference on
Recent Advances in Aerospace Actuation Systems and Components
June 13-15, 2001, Insa Toulouse, France

ISBN 2-87649-034X, 24 papers, 154 pages, 80 coloured figures, 115 black and white figures, printed and electronic, **70 €**

A380 primary flight control actuation system D. Van den BOSSCHE, EADS Airbus, <i>France</i>	1
Complete aircraft simulation for distributed system design P. KRUS, Linköping University, <i>Sweden</i>	5
Integrated hydraulic system simulation - a new approach with Simulink L.D. BLACKMAN, Parker Aerospace, <i>USA</i>	11
Modelling and simulation of pressures within the meshing teeth of gear pumps M. EATON, TRW, <i>England</i> K. EDGE and P. KEOGH, University of Bath, <i>England</i>	21
Theoretical and experimental researches on the slow EH servopumps D. VASILIU, N. VASILIU and C. CALINIOU, Polytechnical University Bucharest, <i>Romania</i>	27
Detailed dynamic model for variable displacement pumps - a new approach with Simulink L.D. BLACKMAN, Parker Aerospace, <i>USA</i>	33
Design study for an EHA actuator for an A330/340 inboard aileron A. NINTZEL, Moog, <i>USA</i>	41
Thermal modelling of an Electro Hydrostatic Actuator system B. JOHANSSON, J. ANDERSSON and P. KRUS, Linköping University, <i>Sweden</i>	49
Electro hydrostatic actuator for primary flight controls of very large aircraft D. MOORHOUSE and M. CARL, TRW, <i>England</i> M. BILDSTEIN, Liebherr Aerospace, <i>Germany</i>	55
Electro hydraulic force generators for the certification of a thrust vector actuator J-C. MARE, Institut National des Sciences Appliquées, <i>France</i> S. CREGUT, TRW, <i>France</i>	59
Power control units with variable displacement hydraulic motors - a strategy for robust system design O. BIEDERMANN, Technical University Hamburg-Harburg, <i>Germany</i>	65
The advanced control system of liquid propellant rocket engines B. GROMYKO, A.V. KIRILLOV, V.V. KIRILLOV, D.S. LATCHINOV, I.A. MIKHALEV, Energomash, <i>Russia</i>	71
Optimal preview predictive control of EH servocontrol system L. YU, Z. WANG and L. QIU, Beijing University of Aeronautics and Astronautics, <i>China</i>	77
Robust control of hydraulic actuators by linearization and crone techniques V. POMMIER, P. LANUSSE, J. SABATIER and A. OUSTALOUP, Univ. de Bordeaux, <i>France</i>	85
Robust mode control of a flexible wing structure U.B. CARL, M.H. GOJNY, Technical University Hamburg-Harburg, <i>Germany</i>	91
Simulation and design process of mechatronic systems D. GAGNE, F. SELLIE and C. ROMAN, Imagine, <i>France</i>	99
A new actuation and control system for the leading edge flaps of an advanced trainer aircraft G. MUSSO, Microtecnica, <i>Italy</i>	107
Hydraulic system definition and simulation J. MAUTIN, EADS Airbus, <i>France</i>	113
Miniature fluid control technology for system pressures ≥ 340 bar J. KLAPPER, Lee, <i>USA</i>	119
Prospects of jet amplifiers in aviation engines automatics A.M. RUSAK, V.A. TSELISHEV and V.S. ZHERNAKOV, UFA State Aviation Technical Univ., <i>Russia</i>	123
The study of the shock absorbers valves using the FEM N. VASILIU, I. ANTONESCU, C. ROSU and C. DRAGOI, Polytechnical University Bucharest, <i>Romania</i>	129
High performance electromechanical actuation for primary flight surfaces D.J. KOPALA and C. DOELL, MPC, <i>USA</i>	135
Novel power electronic topology for optimised drive of electrohydrostatic and electromechanical flight control actuator E. GILSON and J-P. CONARD, SABCA, <i>Belgium</i>	141
Major developments trends of aircraft hydraulic systems Z. WANG, L.QIU and L. YU, Beijing University of Aeronautics and Astronautics, <i>China</i>	146

Proceedings of the 2nd International Conference on
Recent Advances in Aerospace Actuation Systems and Components
Novembre 24-26, 2004, Insa Toulouse, France

ISBN 2-87649-047-1, 29 papers, 182 pages, 163 coloured figures, 71 black and white figures, printed and electronic, **70 €**

Concept Optimization of Aircraft Systems Using Scaling Models	1
P. KRUS, B. JOHANSSON, Linköpings Universitet, AUSTRIAN, Saab Aerosystems, <i>Sweden</i>	
Control of an Electro-Hydrostatic Actuation System for the Nose Landing Gear of an "All Electric Aircraft"	9
C. GREISSNER, U. CARL, Hamburg University of Technology, <i>Germany</i>	
Thermal Design Tool for EHA	15
W. TAKEBAYASHI, Y. HARA, Nabtesco Corporation, <i>Japan</i>	
Electromechanical Actuators Design for Thrust Vector Control	21
S. GRAND, Goodrich Actuation Systems, J-M. VALEMBOS, Thales Airbone Sytems, <i>France</i>	
Ballscrews for the More Electric Aircraft	29
F. PERNI, L. PIZZONI, N. BORGARELLI, Umbra Cuscinetti S.p.A, <i>Italy</i>	
Distributed Electromechanical Actuation for Adaptive Flight Control Elements	35
T. LORKOWSKI, F. HERMLE, Eads Deutschland GmbH, <i>Germany</i> M. FERVEL, A. SANGASAN, Airbus France S.A.S, <i>France</i>	
Object-Oriented Inverse Modelling of Multi-Domain Aircraft Equipment Systems with Modelica	41
J. BALS, G. HOFER, A. PFEIFFER, C. SCHALLERT, German Aerospace Center (DLR), <i>Germany</i>	
Study of Bus Management of Airborne Electromechanical System	49
Z. WANG, L. QIU, Beijing University of Aeronautics and Astronautics, <i>China</i>	
Electrohydraulic Servomechanisms with Two Stages DDV for Heavy Load Simulators Controlled by Adwin	55
N. VASILIU, C. CALINOIU, D. VASILIU, University Politehnica of Bucharest, <i>Romania</i>	
Application of Modern Design Tools in the Selection Process of Seals for High Perf. Actuation Systems	61
T. ANDERSEN, Busak & Shamban Aerospace, <i>Denmark</i>	
Modelling the Dynamics of a Direct-Drive Servovalve for Fail-Operative Primary Flight Control Actuators	67
R. GALATOLO, G. DI RITO, University of Pisa, <i>Italy</i>	
Direct Drive Servo Valve	73
T. NGUYEN, A. De La CHEVASNERIE, S. SANDLER, Goodrich Actuation Systems, <i>France</i>	
Energy Based Criterion for the Stability of Hydraulic & Electro-hydraulic Actuators	79
L. CYROT, Parker Aerospace, <i>USA</i>	
A 380 THSA, Trimmable Horizontal Stabilizer Actuator	85
J-L. PHILIPPE, Ratier Figeac, <i>France</i>	
A380 Hydraulic Slat Drive Channel	91
J. BOWERS, Eaton Aerospace Vickers Systems, <i>England</i>	
Development, Qualification and Verification of the A380 Spoiler EBHA	97
O. BIEDERMANN, M. BILDSTEIN, Liebherr-Aerospace Lindenberg, <i>Germany</i>	
Airbus 380 "Electro-Hydraulic Back-Up Architecture" for Braking and Steering Systems	103
S. DELLAC, D. TERNISIEN, Messier-Bugatti, <i>France</i>	
Smart Actuation Systems for Advanced Rotorcraft Control	109
P. JÄNKER, EADS Corp. Research Centre, V. KLOPPEL, Eurocopter Deutschland GmbH, <i>Germany</i>	
Assessment of Power Consumption of Helicopter Flight Control System without Swashplate	113
T. NEUHEUSER, U. CARL, Hamburg University of Technology, <i>Germany</i>	
Sensorless Speed Control of an Asynchronous Motor - a Military Aircraft Application	119
J-P. CONARD, E. GILSON, SABCA, F. LABRIQUE, Université Catholique de Louvain, <i>Belgium</i>	
Modeling and Simulation of Gripen's Fluid Power Systems	127
B. LANTTO, H. ELLSTROM, H. GAVEL, M. JARELAND, S. STEINKELLNER A. JARLESTAL, M. LANDBERG, Saab AB, <i>Sweden</i>	
Thermal Analysis and Simulation of the A380 Hydraulic System	133
S. LAUCKNER, Airbus, <i>Germany</i>	
Simulation of Airbus A340-600 CLG Pitch Trimmer using Coupled Abaqus / Adams / Easy 5 Models	137
J-F. LECHASSEUR, F. LIOTTE, Messier-Dowty, <i>France</i>	
Fluid Velocity Limits in Hydraulic Systems: Detrimental Effects on Distribution Systems	141
M. CALLENAERE, Airbus, G. SAUTERY, Ecole Centrale de Lyon, <i>France</i>	
Recent Developments in High Pressure Maintenance Free Accumulators for 5000 PSI Aircraft Hydraulics	147
A. DA COSTA, M. VILLENEUVE, PerkinElmer Fluid Sciences, <i>France</i>	
Development of a Phosphate Ester Hydraulic Fluid to Meet New Commercial Requirements	153
D. K. Mc COLLUM, T. C. WOLFE, Solutia Inc., <i>USA</i>	
A Study of a Fault Injection for a Distributed System	161
L. QIU, Z. WANG, Beijing University of Aeronautics and Astronautics, <i>China</i>	
About Pseudoactive Control of Hydraulic Servo Self-Excited Oscillations	167
F. URSU, I. URSU, National Institute for Aerospace Research, <i>Romania</i>	
Some Absolute Stability Restrictions in Output Feedback Synthesis of Electrohydraulic Servos	173
I. URSU, F. URSU, National Institute for Aerospace Research, <i>Romania</i>	

Proceedings of the 3rd International Conference on
Recent Advances in Aerospace Actuation Systems and Components
June 13-15, 2007, Insa Toulouse, France

ISBN 978-2687649-053-6, 35 papers, 225 pages, 218 coloured figures/images, 100 b/w figures/images, printed and electronic, 80 €

Integration and control of electromechanical and electrohydraulic actuators in a hybrid primary flight control architecture	1
O. COCHOY, U.B. CARL, F. THIELECKE, Hamburg University of Technology, <i>Germany</i>	
Electrical flight control technologies for rotorcrafts	9
S. SANDLER, A. HERVIEUX, Goodrich Actuation Systems, <i>France</i>	
Theoretical validation and experimental verification of the electrically assisted hydraulic actuator concept	15
A. DORKEL, O. BIEDERMANN, G. WENNMACHER Liebherr-Aerospace Lindenberg GmbH, <i>Germany</i>	
A380 flight control actuation - Lessons learned on EHAs design	21
M. TODESCHI, Airbus, <i>France</i>	
Research on pump and valve combined scheme of EHA	27
Y. JI, L. QIU, Z. WANG, X. QI, Beijing University of Aeronautics and Astronautics, <i>China</i>	
Innovating engineering-focused software for rotating electrical machines design	33
G. LACOMBE, A. FOGGIA, Y. MARECHAL, Laboratoire d'Electrotechnique de Grenoble, <i>France</i> X. BRUNOTTE, Cedrat SA, <i>France</i>	
Multi-disciplinary flight control development and its integration into multi-attribute computer aided engineering analysis process	39
C. PAULSON, LMS International, <i>USA</i> J. BETTS, LMS International, <i>Belgium</i> C. LEGUAY, Imagine, <i>France</i>	
An integrated design methodology for industrial test benches Application: A380 thrust reverser	45
J. KARIM, N. GUIJARRO, A. DEBIANE, Certia, <i>France</i>	
Experimental implementation of a motion-compensated force control in a hydraulic workbench for flight actuators	51
G. DI RITO, University of Pisa, <i>Italy</i>	
Robust electrohydraulic force control for test rigs	59
A.R. PLUMMER, University of Bath, <i>United Kingdom</i>	
Test means dedicated to recent actuators development	67
J-L. PHILIPPE, Ratier-Figeac, <i>France</i>	
An electrical thrust vector control system with dynamic force feedback	75
G. DÉE, T. VANTHUYNE, P. ALEXANDRE, SABCA, <i>Belgium</i>	
A directly driven EMA for aerospace application	81
C. GERADA, K. BRADLEY, University of Nottingham, <i>United Kingdom</i> C. WHITLEY, G. TOWERS, Smiths Aerospace Actuation Systems, <i>United Kingdom</i>	
Development of an integrated electromechanical actuator for single flap drive concepts	87
C. GIEBELER, M. RECKSIEK, Airbus Deutschland, <i>Germany</i>	
Design and reliability of a rudder EMA with an integrated permanent magnet machine and matrix converter drive	93
P. WHEELER, University of Nottingham, <i>United Kingdom</i> C. WHITLEY, G. TOWERS, Smiths Aerospace Actuation Systems, <i>United Kingdom</i>	
An approach to the investigation of oscillatory failure cases in electro-hydraulic actuation systems	99
H. SACHS, U.B. CARL, F. THIELECKE, Hamburg University of Technology, <i>Germany</i>	
Control and monitoring of a trimmable horizontal stabilizer actuator with two primary load paths	105
N. WACHENDORF, U.B. CARL, F. THIELECKE, Hamburg University of Technology, <i>Germany</i>	
Condition monitoring for flight control actuation systems	111
J. BABINSKI, Danaher Motion, <i>USA</i>	
Fault-tolerant control of EHA with digital hydraulic valve system	115
L. SIIVONEN, J. AALTONEN, M. LINJAMA, M. VILENIUS, Tampere University of Technology, <i>Finland</i>	
Eco-materials for next generation aircraft hydraulic sealing systems	121

Modelling of actuators for the conceptual design phase	126
DELL'AMICO A., LARSSON F., KNÖÖS FRANZEN L., KRUS P., Saab AB/Linköping University, <i>Sweden</i>	
Models and indicators for actuators sizing of resonant electromechanical ice protection system	132
RAFIK Y., BUDINGER M., Institut Clément Ader, <i>France</i> POMMIER-BUDINGER V., ISAE-Supaero, <i>France</i>	
Multibody simulation of a ball screw recirculation channel jamming	138
BERTOLINO A. C., DE MARTIN A., JACAZIO G., SORLI M., Politecnico di Torino, <i>Italy</i>	

New concept of electromechanical actuation system for flight control application	144
ONODERA J., MIYAZONO K., SUGIURA H., NISHIYAMA Y., Kawasaki Heavy Industries Ltd, <i>Japan</i>	
Optimisation of a torque controller for electro-mechanical flight surface actuation	152
MICHEL K., SCHALLERT C., German Aerospace Center, <i>Germany</i>	
Performance verification of electro-hydrostatic nose landing gear actuation and steering	160
DUVAL M. N., BASSETT S., LAMMERING T., Liebherr-Aerospace Lindenberg, <i>Germany</i>	
Preparing electro-mechanical actuation technology for upcoming applications – an overview of current activities at Liebherr-Aerospace	166
WEBER G., DREYER N., FAILENSCHMID A., IMMLER T., GISELBRECHT R., Liebherr Aerospace Lindenberg, <i>Germany</i> - KLÖBEN W., August Steinmeyer GmbH, <i>Germany</i>	
Pseudo-direct drive for blade pitch control actuation	175
DRAGAN R., BARRETT R., WILSON G., KINGHORN R., POWELL D., Magnomatics, <i>UK</i>	
Real-time models of EMAs supporting the development of a PHM system	181
BERTOLINO A. C., DE MARTIN A., JACAZIO G., SORLI M., Politecnico di Torino, <i>Italy</i>	
Reduction of hydraulic pressure pulsation in modern aircraft hydraulics	187
METZLER D., EBERL R., ZANETTI DE LIMA L., Liebherr-Aerospace Lindenberg, <i>Germany</i>	
KLAERNER M., KROLL L. Chemnitz University of Technology, <i>Germany</i>	
KLOFT P., KUSSEROW T., Hydac, <i>Germany</i>	
SANDER M., THIELECKE F., Hamburg University of Technology, <i>Germany</i>	
Rotary based actuation subsystem with dissimilar power sources	193
SOBOLEWSKI P., NAIR S., MALENSHEK M., Woodward Inc., <i>USA</i>	
KNIGHT M., Gulfstream Aerospace Corporation, <i>USA</i>	
Rotary EM actuation (REMA) implementation for a primary flight control application	199
ZATLOFF E., Curtiss-Wright Actuation Division, <i>USA</i>	
Space Rider aerodynamic surface control system	208
DEMUYSÈRE P., VERHOEVEN D., Sabca, <i>Belgium</i> - AKITANI S., Thales Alenia Space, <i>Italy</i>	
Virtual testing of skew detection concepts for future leading edge slats	217
KRALL K., SCHUBERT B., THIELECKE F., Hamburg University of Technology, <i>Germany</i>	
LADNER R., Liebherr Aerospace, <i>Germany</i>	

Communications included in the proceedings (no presentation in the plenary session)

CFD heat transfer optimization for a heat exchanger of an electric motor	224
DELL'UOMO A., RESSEGOTTI D., MAURO G., NOTARGIACOMO S., Rina CSM, <i>Italy</i>	
ROMEO P., PISPOLA G., CIOTTI M., D'ANDREA M., Umbragroup S.P.A., <i>Italy</i>	
Physics-based pump condition monitoring by mapping internal and external features	230
HOU S., LYU F., ZHANG J., XU B., LI X., GUO Y., Zhejiang University, <i>China</i>	
Validation platform using co-simulation environment FMUs validation	238
JUDE M., Chiastek SAS, <i>France</i>
