

Proceedings of the International Conference on
Recent Advances in Aerospace Hydraulics

Novembre 24-26, 1998, Insa Toulouse, France

ISBN 2-87649-023-4, 23 papers, 169 pages, 156 black and white figures, 60 €

Reliability and service experience of aerospace hydraulic rotating equipment	1
J.J. SCHWEITZER, Vickers Inc., <i>USA</i> G. BARROW, Aeroquip-Vickers Ltd, <i>England</i>	
Method for integrated systems design - A study of EHA systems	7
K. NILSSON, Saab AB, <i>Sweden</i> J. ANDERSSON and P. KRUS, Linköping Univ., <i>Sweden</i>	
Direct drive fuel valve (DDFV)	15
M.L. DARDENNE and G. D'AGOSTINO, Snecma, <i>France</i> E. PERRODEAU, Salm, <i>France</i>	
A unified strategy for flight control actuators	19
M.G. KLIFFKEN, Robert Bosch GmbH, <i>Germany</i> M.H. GOJNY, Technische Universität Hamburg Harburg, <i>Germany</i>	
High pressure hydraulic pumps	25
J.A. HALAT, P.W. GALLOWAY, Vickers Incorporated, <i>USA</i>	
A brief history of high pressure hydraulics	31
J. JEFFERY, Parker Hannifin Corporation, <i>USA</i>	
High pressure filter screen capabilities for aerospace programmes	63
J. KLAPPER, the Lee Company, <i>USA</i>	
Potential of secondary control for hydraulic drives used in modern flight control systems	67
M. IVANTYSYNOVA, Gerhard Mercator University of Duisburg, <i>Germany</i>	
Power control units with secondary controlled hydraulic motors - a new concept for application in aircraft high lift systems	73
O. BIEDERMANN, Technische Universität Hamburg-Harburg, <i>Germany</i> G. GEERLING, Mannesmann Rexroth Brueninghaus Hydromatik GmbH, <i>Germany</i>	
Researches on aerospace hydraulics in Romania	79
N. VASILIU, D. VASILIU, C. CALINOIU and V. MURARU, Politehnica University of Bucharest, <i>Romania</i>	
EHA application to commercial transports : the Aérospatiale approach	85
D. VAN DEN BOSSCHE, Aérospatiale, <i>France</i>	
Flight Control EHAs : Towards high powers	89
B. THORAVAL, Lucas Aerospace, <i>France</i>	
EHA for flight testing on Airbus A321 / Power losses of fix pump EHA versus variable pump EHA	101
M. BILDSTEIN, Liebherr Aerospace Lindenberg GmbH, <i>Germany</i>	
An approach to EHA standardization	105
A. ARNAUD, Salm, <i>France</i>	
The BRISC : A specific processor dedicated to the command of AC electromechanical actuators	117
E. GILSON and J.L. DEBAUCHE, Sabca, <i>Belgium</i>	
Modular triple-simplex redundant EHA developed for Moog R&D	123
B. WAFFNER, Moog Incorporated, <i>USA</i>	
Research on PbW airborne hydraulic actuation system	127
Z. WANG, L. QIU and X. QI, Beijing University of Aeronautics and Astronautics, <i>China</i>	
JSF Integrated Subsystems Technology (J/IST) – Not printed !	133
D. EICKE, Lockheed Martin Tactical Aircraft Systems, <i>USA</i> A. MORDKOVITZ, Parker Hannifin Corporation, <i>USA</i>	
A solution for structural coupling in a thrust vector control system (TVC)	135
D. MARTINEZ, P. CAYE and P. TRILLAT, Aérospatiale, <i>France</i>	
Some aspects of the stability of missiles flight control systems using electrohydraulic actuators	143
R. LUCA, Military Technical Academy, <i>Romania</i>	
The design of pitch and roll actuators for a high performance human centrifuge	149
P. MOULAIRE, Imagine, <i>France</i> J.C. MARE, INSA Toulouse, <i>France</i> , T. EFTYMIADES, Latécoère, <i>France</i>	
Experimental investigation of observer based robust failure detection of hydraulic control actuator	155
L. QIU, Z. WANG and X. DONG, Beijing Univ. of Aeronautics and Astronautics, <i>China</i>	
The use of an impedance analysis of an hydraulic servo to investigate control compensation for flutter suppression	161
R. RAVALL, Fairey Hydraulics Ltd, <i>England</i> N.D. VAUGHAN, University of Bath, <i>England</i>	

Proceedings of the 1st International Conference on
Recent Advances in Aerospace Actuation Systems and Components
June 13-15, 2001, Insa Toulouse, France

ISBN 2-87649-034X, 24 papers, 154 pages, 80 coloured figures, 115 black and white figures, printed and electronic, **70 €**

A380 primary flight control actuation system D. Van den BOSSCHE, EADS Airbus, <i>France</i>	1
Complete aircraft simulation for distributed system design P. KRUS, Linköping University, <i>Sweden</i>	5
Integrated hydraulic system simulation - a new approach with Simulink L.D. BLACKMAN, Parker Aerospace, <i>USA</i>	11
Modelling and simulation of pressures within the meshing teeth of gear pumps M. EATON, TRW, <i>England</i> K. EDGE and P. KEOGH, University of Bath, <i>England</i>	21
Theoretical and experimental researches on the slow EH servopumps D. VASILIU, N. VASILIU and C. CALINIOU, Polytechnical University Bucharest, <i>Romania</i>	27
Detailed dynamic model for variable displacement pumps - a new approach with Simulink L.D. BLACKMAN, Parker Aerospace, <i>USA</i>	33
Design study for an EHA actuator for an A330/340 inboard aileron A. NINTZEL, Moog, <i>USA</i>	41
Thermal modelling of an Electro Hydrostatic Actuator system B. JOHANSSON, J. ANDERSSON and P. KRUS, Linköping University, <i>Sweden</i>	49
Electro hydrostatic actuator for primary flight controls of very large aircraft D. MOORHOUSE and M. CARL, TRW, <i>England</i> M. BILDSTEIN, Liebherr Aerospace, <i>Germany</i>	55
Electro hydraulic force generators for the certification of a thrust vector actuator J-C. MARE, Institut National des Sciences Appliquées, <i>France</i> S. CREGUT, TRW, <i>France</i>	59
Power control units with variable displacement hydraulic motors - a strategy for robust system design O. BIEDERMANN, Technical University Hamburg-Harburg, <i>Germany</i>	65
The advanced control system of liquid propellant rocket engines B. GROMYKO, A.V. KIRILLOV, V.V. KIRILLOV, D.S. LATCHINOV, I.A. MIKHALEV, Energomash, <i>Russia</i>	71
Optimal preview predictive control of EH servocontrol system L. YU, Z. WANG and L. QIU, Beijing University of Aeronautics and Astronautics, <i>China</i>	77
Robust control of hydraulic actuators by linearization and crone techniques V. POMMIER, P. LANUSSE, J. SABATIER and A. OUSTALOUP, Univ. de Bordeaux, <i>France</i>	85
Robust mode control of a flexible wing structure U.B. CARL, M.H. GOJNY, Technical University Hamburg-Harburg, <i>Germany</i>	91
Simulation and design process of mechatronic systems D. GAGNE, F. SELLIE and C. ROMAN, Imagine, <i>France</i>	99
A new actuation and control system for the leading edge flaps of an advanced trainer aircraft G. MUSSO, Microtecnica, <i>Italy</i>	107
Hydraulic system definition and simulation J. MAUTIN, EADS Airbus, <i>France</i>	113
Miniature fluid control technology for system pressures ≥ 340 bar J. KLAPPER, Lee, <i>USA</i>	119
Prospects of jet amplifiers in aviation engines automatics A.M. RUSAK, V.A. TSELISHEV and V.S. ZHERNAKOV, UFA State Aviation Technical Univ., <i>Russia</i>	123
The study of the shock absorbers valves using the FEM N. VASILIU, I. ANTONESCU, C. ROSU and C. DRAGOI, Polytechnical University Bucharest, <i>Romania</i>	129
High performance electromechanical actuation for primary flight surfaces D.J. KOPALA and C. DOELL, MPC, <i>USA</i>	135
Novel power electronic topology for optimised drive of electrohydrostatic and electromechanical flight control actuator E. GILSON and J-P. CONARD, SABCA, <i>Belgium</i>	141
Major developments trends of aircraft hydraulic systems Z. WANG, L.QIU and L. YU, Beijing University of Aeronautics and Astronautics, <i>China</i>	146

Proceedings of the 2nd International Conference on
Recent Advances in Aerospace Actuation Systems and Components
 Novembre 24-26, 2004, Insa Toulouse, France

ISBN 2-87649-047-1, 29 papers, 182 pages, 163 coloured figures, 71 black and white figures, printed and electronic, **70 €**

Concept Optimization of Aircraft Systems Using Scaling Models	1
P. KRUS, B. JOHANSSON, Linköpings Universitet, AUSTRIAN, Saab Aerosystems, <i>Sweden</i>	
Control of an Electro-Hydrostatic Actuation System for the Nose Landing Gear of an "All Electric Aircraft"	9
C. GREISSNER, U. CARL, Hamburg University of Technology, <i>Germany</i>	
Thermal Design Tool for EHA	15
W. TAKEBAYASHI, Y. HARA, Nabtesco Corporation, <i>Japan</i>	
Electromechanical Actuators Design for Thrust Vector Control	21
S. GRAND, Goodrich Actuation Systems, J-M. VALEMBOSIS, Thales Airbone Sytems, <i>France</i>	
Ballscrews for the More Electric Aircraft	29
F. PERNI, L. PIZZONI, N. BORGARELLI, Umbra Cuscinetti S.p.A, <i>Italy</i>	
Distributed Electromechanical Actuation for Adaptive Flight Control Elements	35
T. LORKOWSKI, F. HERMLE, Eads Deutschland GmbH, <i>Germany</i> M. FERVEL, A. SANGASAN, Airbus France S.A.S, <i>France</i>	
Object-Oriented Inverse Modelling of Multi-Domain Aircraft Equipment Systems with Modelica	41
J. BALS, G. HOFER, A. PFEIFFER, C. SCHALLERT, German Aerospace Center (DLR), <i>Germany</i>	
Study of Bus Management of Airborne Electromechanical System	49
Z. WANG, L. QIU, Beijing University of Aeronautics and Astronautics, <i>China</i>	
Electrohydraulic Servomechanisms with Two Stages DDV for Heavy Load Simulators Controlled by Adwin	55
N. VASILIU, C. CALINOIU, D. VASILIU, University Politehnica of Bucharest, <i>Romania</i>	
Application of Modern Design Tools in the Selection Process of Seals for High Perf. Actuation Systems	61
T. ANDERSEN, Busak & Shamban Aerospace, <i>Denmark</i>	
Modelling the Dynamics of a Direct-Drive Servovalve for Fail-Operative Primary Flight Control Actuators	67
R. GALATOLO, G. DI RITO, University of Pisa, <i>Italy</i>	
Direct Drive Servo Valve	73
T. NGUYEN, A. De La CHEVASNERIE, S. SANDLER, Goodrich Actuation Systems, <i>France</i>	
Energy Based Criterion for the Stability of Hydraulic & Electro-hydraulic Actuators	79
L. CYROT, Parker Aerospace, <i>USA</i>	
A 380 THSA, Trimmable Horizontal Stabilizer Actuator	85
J-L. PHILIPPE, Ratier Figeac, <i>France</i>	
A380 Hydraulic Slat Drive Channel	91
J. BOWERS, Eaton Aerospace Vickers Systems, <i>England</i>	
Development, Qualification and Verification of the A380 Spoiler EBHA	97
O. BIEDERMANN, M. BILDSTEIN, Liebherr-Aerospace Lindenberg, <i>Germany</i>	
Airbus 380 "Electro-Hydraulic Back-Up Architecture" for Braking and Steering Systems	103
S. DELLAC, D. TERNISIEN, Messier-Bugatti, <i>France</i>	
Smart Actuation Systems for Advanced Rotorcraft Control	109
P. JÄNKER, EADS Corp. Research Centre, V. KLOPPEL, Eurocopter Deutschland GmbH, <i>Germany</i>	
Assessment of Power Consumption of Helicopter Flight Control System without Swashplate	113
T. NEUHEUSER, U. CARL, Hamburg University of Technology, <i>Germany</i>	
Sensorless Speed Control of an Asynchronous Motor - a Military Aircraft Application	119
J-P. CONARD, E. GILSON, SABCA, F. LABRIQUE, Université Catholique de Louvain, <i>Belgium</i>	
Modeling and Simulation of Gripen's Fluid Power Systems	127
B. LANTTO, H. ELLSTROM, H. GAVEL, M. JARELAND, S. STEINKELLNER A. JARLESTAL, M. LANDBERG, Saab AB, <i>Sweden</i>	
Thermal Analysis and Simulation of the A380 Hydraulic System	133
S. LAUCKNER, Airbus, <i>Germany</i>	
Simulation of Airbus A340-600 CLG Pitch Trimmer using Coupled Abaqus / Adams / Easy 5 Models	137
J-F. LECHASSEUR, F. LIOTTE, Messier-Dowty, <i>France</i>	
Fluid Velocity Limits in Hydraulic Systems: Detrimental Effects on Distribution Systems	141
M. CALLENAERE, Airbus, G. SAUTERY, Ecole Centrale de Lyon, <i>France</i>	
Recent Developments in High Pressure Maintenance Free Accumulators for 5000 PSI Aircraft Hydraulics	147
A. DA COSTA, M. VILLENEUVE, PerkinElmer Fluid Sciences, <i>France</i>	
Development of a Phosphate Ester Hydraulic Fluid to Meet New Commercial Requirements	153
D. K. Mc COLLUM, T. C. WOLFE, Solutia Inc., <i>USA</i>	
A Study of a Fault Injection for a Distributed System	161
L. QIU, Z. WANG, Beijing University of Aeronautics and Astronautics, <i>China</i>	
About Pseudoactive Control of Hydraulic Servo Self-Excited Oscillations	167
F. URSU, I. URSU, National Institute for Aerospace Research, <i>Romania</i>	
Some Absolute Stability Restrictions in Output Feedback Synthesis of Electrohydraulic Servos	173
I. URSU, F. URSU, National Institute for Aerospace Research, <i>Romania</i>	

Proceedings of the 3rd International Conference on
Recent Advances in Aerospace Actuation Systems and Components
June 13-15, 2007, Insa Toulouse, France

ISBN 978-2687649-053-6, 35 papers, 225 pages, 218 coloured figures/images, 100 b/w figures/images, printed and electronic, **80 €**

Integration and control of electromechanical and electrohydraulic actuators in a hybrid primary flight control architecture	1
O. COCHOY, U.B. CARL, F. THIELECKE, Hamburg University of Technology, <i>Germany</i>	
Electrical flight control technologies for rotorcrafts	9
S. SANDLER, A. HERVIEUX, Goodrich Actuation Systems, <i>France</i>	
Theoretical validation and experimental verification of the electrically assisted hydraulic actuator concept	15
A. DORKEL, O. BIEDERMANN, G. WENNMACHER Liebherr-Aerospace Lindenberg GmbH, <i>Germany</i>	
A380 flight control actuation - Lessons learned on EHAs design	21
M. TODESCHI, Airbus, <i>France</i>	
Research on pump and valve combined scheme of EHA	27
Y. JI, L. QIU, Z. WANG, X. QI, Beijing University of Aeronautics and Astronautics, <i>China</i>	
Innovating engineering-focused software for rotating electrical machines design	33
G. LACOMBE, A. FOGGIA, Y. MARECHAL, Laboratoire d'Electrotechnique de Grenoble, <i>France</i> X. BRUNOTTE, Cedrat SA, <i>France</i>	
Multi-disciplinary flight control development and its integration into multi-attribute computer aided engineering analysis process	39
C. PAULSON, LMS International, <i>USA</i> J. BETTS, LMS International, <i>Belgium</i> C. LEGUAY, Imagine, <i>France</i>	
An integrated design methodology for industrial test benches Application: A380 thrust reverser	45
J. KARIM, N. GUIJARRO, A. DEBIANE, Certia, <i>France</i>	
Experimental implementation of a motion-compensated force control in a hydraulic workbench for flight actuators	51
G. DI RITO, University of Pisa, <i>Italy</i>	
Robust electrohydraulic force control for test rigs	59
A.R. PLUMMER, University of Bath, <i>United Kingdom</i>	
Test means dedicated to recent actuators development	67
J-L. PHILIPPE, Ratier-Figeac, <i>France</i>	
An electrical thrust vector control system with dynamic force feedback	75
G. DÉE, T. VANTHUYNE, P. ALEXANDRE, SABCA, <i>Belgium</i>	
A directly driven EMA for aerospace application	81
C. GERADA, K. BRADLEY, University of Nottingham, <i>United Kingdom</i> C. WHITLEY, G. TOWERS, Smiths Aerospace Actuation Systems, <i>United Kingdom</i>	
Development of an integrated electromechanical actuator for single flap drive concepts	87
C. GIEBELER, M. RECKSIEK, Airbus Deutschland, <i>Germany</i>	
Design and reliability of a rudder EMA with an integrated permanent magnet machine and matrix converter drive	93
P. WHEELER, University of Nottingham, <i>United Kingdom</i> C. WHITLEY, G. TOWERS, Smiths Aerospace Actuation Systems, <i>United Kingdom</i>	
An approach to the investigation of oscillatory failure cases in electro-hydraulic actuation systems	99
H. SACHS, U.B. CARL, F. THIELECKE, Hamburg University of Technology, <i>Germany</i>	
Control and monitoring of a trimmable horizontal stabilizer actuator with two primary load paths	105
N. WACHENDORF, U.B. CARL, F. THIELECKE, Hamburg University of Technology, <i>Germany</i>	
Condition monitoring for flight control actuation systems	111
J. BABINSKI, Danaher Motion, <i>USA</i>	
Fault-tolerant control of EHA with digital hydraulic valve system	115
L. SIIVONEN, J. AALTONEN, M. LINJAMA, M. VILENIUS, Tampere University of Technology, <i>Finland</i>	
Eco-materials for next generation aircraft hydraulic sealing systems	121
S. ROEPSTORFF, T. ANDERSEN, Trelleborg Sealing Solutions, <i>Denmark</i>	
Non-invasive method for internal hydraulic leak check	127
V. BAUMBACH, Airbus Bremen, <i>Germany</i> B. FUNCK, Flexim Labs LLC, <i>USA</i>	
Digital control for the management of airborne fluidic systems	131
F. BACH, B. BOUHIER, S. GRAND, Goodrich Actuation Systems, <i>France</i>	
Distributed embedded computing for advanced control systems based on time-triggered protocol (TTP) and architecture (TTA)	137

Fuel Metering for Hydrogen Powered Aircraft	107
PLUMMER A., ADEYEMI D., BURDEN D., University of Bath/Moog Aircraft Group Tewkesbury, <i>United Kingdom</i>	
Health Monitoring Analysis and Fault Prediction of Harmonic Drives for Electro-mechanical Flight Control Actuators	112
BERTOLINO A. C., DE MARTIN A., GUIDA R., JACAZIO G., SORLI M., Politecnico di Torino, <i>Italy</i>	

Health Monitoring System for Electromechanical Actuation System Pre-Flight Status Assessment	119
GOMEZ DE MARISCAL B., VILLAR DOMINGUEZ A., GALLEGO A., FERNANDEZ J. A., NOVILLO E., LOPEZ DE CALLE K., FERNANDEZ A., EGAÑA I., Compañía Española de Sistemas Aeronáuticos, S.A.U./Fundacion Tekniker, <i>Spain</i>	
Identifying Key Predictors of Failure in Electro-Mechanical Actuator	127
RAUNIO V., ALENIUS M., PARTAP SINGH V., MINAV T., Faculty of Engineering and Natural Science, Tampere University, <i>Finland</i>	
Influence of the Spindle Flow Distribution Pair on the Performance of Micro Electro-hydrostatic Actuator	135
TONG C., ZANG Y., LI S., RUAN J., Zhejiang University of Technology, <i>China</i>	
Key Considerations for Future Distributed Flap Drive Systems based on Comparisons with an Electric Cargo Door Actuation System	143
BRADY M., FLEDDERMANN A., HASERODT J., Airbus Operations GmbH, <i>Germany</i>	
Laboratory Testing of Torque Control of Electro-Mechanical Flight Surface Actuation including Friction Compensation	150
SCHALLERT C., German Aerospace Center (DLR e.V.), <i>Germany</i>	
Magnetically Geared Blade Pitch Control Actuation – Test Results	158
DRAGAN R., BARRETT R., WILSON G., KINGHORN R., POWELL D., CALVERLEY S., Magnomatics Limited, <i>United Kingdom</i>	
Modelling and Performance Validation of a Novel Fault-Tolerant EHA for Helicopter Flight Controls	166
SUN M., FU J., WANG C., YU L., WANG W., BAI L., Beihang University/Avic, <i>China</i>	
Prestressed PZT Actuators for Electromechanical Resonant De-icing	173
SABATHÉ Y., BUDINGER M., POMMIER-BUDINGER V., Institut Clément Ader/ENAC ISAE-SUPAERO ONERA, Toulouse, <i>France</i>	
Sensor Fusion Controller for Fault Tolerant EMA	180
WANG R., VANDERWEIDE D., WALLACE R., Eaton, <i>United States</i>	
Servovalves Models for Customers	188
ACHILLE R., MARÉ J.-C., Politecnico di Torino/Institut Clément Ader, INSA Toulouse, <i>Italy/France</i>	
The Thrust Vector Actuation Systems (TVAS) of Ariane 6	194
LAVATELLI A., ALEXANDRE P., DE COSTER F., RONCHAIN P., VADALA G., SABCA, <i>Belgium</i>	
Validation of Skew Detection Concepts for Future Leading-Edge Slats	200
KRALL K., THIELECKE F., Hamburg University of Technology, Institute of Aircraft Systems Engineering, <i>Germany</i>
